

Uni-Directional Barrier Board Class 2 Reflective - Board Only

Product Images

Short Description

Class 2 Reflective, sold as a board only. A-frame steel stands available separately.

Description

Highly visible barrier board constructed of heavy duty black PVC. This uni-directional barrier board has yellow reflective chevron stripes on both sides. Featuring Class 2 Reflective strips, it is suitable for traffic and civil applications where a high visibility barrier is required for both day and night. Barrier boards are a must for traffic controllers, road workers and civil construction workers needing to block off a lane, roadway, area or zone.

Sold individually, each board measures 2.5 metres long. Lightweight and easily transportable, it can be fitted with yellow powdercoated metal barrier board stands (sold separately), or fitted with flashing hazard lamps for extra visibility.
