

Non- Reflective Traffic Cone 450mm - Orange

Product Images

Short Description

450mm orange non-reflective traffic cone. We can put your logo or name on traffic cones, call for pricing.

Description

Highly visible orange traffic cone. A tough, heavy duty rubber base prevents the cone from tipping over in the wind. At 450mm tall this cone creates a highly visible traffic delineation. Traffic cones, otherwise known as witches hats, channelizing devices or construction cones, are a great way to mark out hazards at your site, workplace, along a road or in a public area. Commonly used during road works to temporarily redirect traffic in a safe manner, traffic cones can prompt motorists to merge lanes or avoid temporary hazards.

- 450 mm high
- Blaze orange body for excellent visibility
- Heavyweight black base for stability
- Custom printing available, please enquire

We print on our flexible 450mm PVC traffic cones. Jaybro can print your logo or name on traffic cones - call us for pricing.
