

Stackable Mighty Cone 6kg Base Only - Not Available in WA

Product Images

Short Description

Heavy 6kg base weight to suit Jaybro's range of stackable Mighty Bollards. This is the base only, bollards can be purchased separately.

Description

Black 6kg base weight for the stackable Mighty Cone traffic bollard range. This base comes with a moulded handle which allows you to carry and deploy it easily. Weighted bases can be stacked to offer better support for high traffic or windy applications. The 'mighty cone' 1 metre high cone is sold separately and is ideal for situations where visibility of smaller cones is limited. Made from strong plastic with a white reflective collar, the mighty cone is an ideal traffic management tool for road works and other temporary road or traffic changes that need to be signposted for safety. The 6kg base is sturdy enough to hold the cone in place for most applications, and has a 210mm hole. The cones and bases are sold separately, and these mighty cones can be stacked easily with the bases attached, or without. Bright red colouring of the cone ensures these witches hats are easily visible to motorists or pedestrians.

- 6kg weighted base
- Fits mighty cones
- Handle for easy carrying and deployment
- Hole diameter 210mm
- Pallet Qty: 100
