

Steel Fence Posts 1500mm (Dropper)

Product Images

Short Description

1550mm steel star post / dropper. **Sold in increments of 10 only.**

Description

These star posts are made from mild steel (200 grade) which means they are lightweight yet strong. Mild steel offers a reduced chance of rusting, meaning they last longer in the field. Star pickets, also known as steel fence posts, T-posts, Y-posts, Waratahs or star posts are commonly used to support various types of wire, barrier mesh, silt fence or wire mesh. The posts are driven into the ground to support a range of perimeter fencing types. Fix your fencing with our annealed tie wire using the holes down the length of the post.

- 1550mm Steel Star post
- Sold in increments of 10 only
- 200 Grade mild steel resists rusting
- Use with [annealed tie wire](#) also available from Jaybro
