

Cable Ties 200 x 4mm Bag of 500

Product Images

Short Description

Zip ties or cable ties, 200 mm long x 4 mm wide. Supplied in a bag of 500.

Description

Black 200mm long cable ties or zip ties, 500 ties per bag. Pack of 500 cable ties. These cable ties are essential on all types of jobs. Made from black nylon, they are durable and resist snapping making them ideal for heavy duty environments such as construction, building, landscaping, electrical and utilities, and all sorts of indoor and outdoor environments. The length of each cable tie is 200mm making them a good all round small cable tie. Each pack contains 500 ties for all types of tying jobs.

They have a multitude of uses around the job site and are also known as zip ties, hose ties and wire ties. These cheap and easy to use fasteners are an essential for any toolbox. They can be used to fix banner mesh to temporary fencing, hold cables and hose together, fix small items for transport, bundle small supplies, fix conduits in place, tie wire mesh together and all sorts of other applications.

These single use fasteners need to be cut to be removed and therefore they are a disposable item. It's convenient to have a bag on hand on the job site. Cable ties are simple to use and simply involve inserting

the pointed end of the plastic tie into the slot in the head. The ratchet teeth slide one way and not the other, causing the tie to hold fast and lock when it is tightened. The excess end can be left as is or cut for a neat finish.
