
SILTmasta Silt Sediment Sock 4m

Product Images

Short Description

Silt sediment sock, 200mm wide x 4m roll, supplied unfilled. Made from high strength UV resistant filter fabric, designed to go around drains and trap any sediment but allow water to flow through.

Description

SILTmasta Silt Socks are factory fabricated from high quality UV resistant filter fabric. SILTmasta Silt Socks are designed to go around drains and trap any sediment but allow water to flow through.

Silt Socks can be filled with sand or gravel and placed around stormwater inlets or across open drains. The purpose is to minimise the silt or sediment loss from sites and the entry of these particles into storm water systems, and essentially protect the natural waterways.

Material consists of PET. Silt socks area available in 50m rolls or 4m lengths.

- Weight: approximately 300g each
- Carton Qty: 15
- Pallet Qty: 300
