

SILTmasta Sand Bag Filler

Product Images

Short Description

Utilising sandbags for flood control and construction work can be labour intensive. Filling hessian bags using

a shovel takes 2 people and in recent years sandbag hoppers have become an increasingly popular choice to reduce the time taken to fill bags. This hopper style sandbag filler makes it easy to fill sandbags, requiring just one person.

Description

Our innovative sandbag filler designed for maximum efficiency and worker safety. With dimensions of 1m in length, 70cm width at the bottom, and 50cm width at the top, this device streamlines the process of filling sand bags and SILTmasta™ Silt Bags. By eliminating the need for bending and lifting, it minimizes the risk of sprains and strains, ultimately reducing workplace injuries and potential WHS claims. This single-person-operated solution not only saves time but also contributes to a safer work environment, making it an essential tool for your business's success.

- Weight: 8.25kg
