
SILTmasta Floating Silt Curtain 1.5 x 15m

Product Images

Short Description

Silt curtain 1.5 x 15m, custom sizes available. Used to restrain runoff in bodies of water by acting as a floating silt barrier. **Note that 2 weeks lead time is required on this product.**

Description

The SILTmasta Silt Curtain controls silt run off in streams by acting as a floating barrier. The curtain is made from geotextile material with polystyrene floats and a ballast pocket at the bottom for chain.

Silt Curtains, also known as Sediment Curtains or Flotation Curtains are designed and used to control sediment, algae or debris movement in waterways. They consist of a high visibility reinforced plastic flotation pocket and a non-woven needle punched geotextile skirt to act as the filter and ballast pocket.

The SILTmasta Silt Curtain restrains run off in bodies of water by acting as a floating silt barrier. They are used to control sediment as well as preventing algae or debris movement in waterways. A high visibility 300gsm PET Non-Woven geotextile curtain is supported by a closed cell foam float at the top edge.

Features:

- Standard size 15m wide x 1.5m deep
- 100 l/m/s flow rate
- 300gsm PET Non-Woven Geotextile
- Custom sizes available
- Easy to install and remove
- Closed cell foam flotation device
- Traps silt, algae and construction debris near waterways
- Weight: approximately 6.15kg
