Product Images

Short Description

Full Fingered Anti-Vibration Gloves in Size XL. Synthetic glove with anti-vibration pads on fingers and palm, ideal for most construction applications.

Description

General purpose synthetic glove with anti-vibration pads on fingers and palm. Also known as mechanics gloves, these gloves are fully washable, tight fitting, durable and long lasting, making them the ideal hand protection for most construction applications including use with jackhammers, compactors and much more.

These gloves are particularly effective for workers needing protection from the fatiguing effects of vibrating machinery, tools and equipment. The soft padded inserts providing a shock absorbing effect enabling the glove to provide excellent anti-vibration protection. In size XL they fit most hands.
