

Everest Permanent Concrete Anchor

Product Images

Short Description

Everest permanent M16 concrete anchor, Certified to 22kN. Made from stainless steel, easy to install - comes complete with a chemical capsule.

Description

Ideal for roofing, construction and general industrial use, this roof anchor connector offers high strength and durability to withstand rugged environments. Anchors are a critical component of your fall protection set up, namely because they securely attach your system to the roof or anchorage point. Your choice of anchor depends on the type of work being done. This fixed concrete anchor provides a secure point of attachment for a personal fall arrest system, and is capable of supporting a load of 22kN. Easy to install, these rugged permanent anchors are specifically designed to be attached to concrete structures including walls, floors, decks and columns. Made from stainless steel, it is supplied with a chemical capsule for chemical anchoring.

Features:

- Stainless Steel construction
- Suitable for concrete surfaces
- Capable of supporting a load up to 22kN
- Permanent anchor
- Easy to install
- Comes complete with a chemical anchor
