

Confined Space Entry Kit with 9ft Tripod

Product Images

Short Description

Confined Space Entry Kit - 15m Rope System Kit with a SWL of 250 Kg. Includes full body confined space harness, spreader bar, 2 karabiners, 15m rope rescue kit and 9ft tripod.

Description

The confined space rescue kit has been designed specifically for working in and the rescue from confined spaces. It has been designed to be set up by one person and is easy to transport. Manufactured to stand up to the harsh demands of everyday use, this confined space entry kit includes a basic rescue rope setup.

RPD (rescue positioning device) with 50 metres of rope and the ability to raise and lower pulleys with 4:1 ratio. This unit is equipped with an overspeed breaking mechanism and can be used in 'free-fall' mode. The system provides up to 15 metres of travel with extra rope length available for larger drops.

The kit includes a full body confined space harness, spreader bar, 2 karabiners, 15m rope rescue kit and a 9ft tripod with a SWL of 250kg.

Kit Includes:

- Full Body Confined Space Harness
- Spreader Bar
- 2 x Karabiners
- 15m Rope Rescue Kit

- 9ft Tripod
