

# Confined Space Entry Kit - 9' Basic Winch System

## Product Images

## Short Description

---

Confined Space Entry Kit - Basic 9 ft tripod winch system with a Safe Working Load of 140kg. Includes full body confined space harness, spreader bar, 2 karabiners, 20m rescue winch and 9 ft tripod.

## Description

---

The confined space rescue kit has been designed specifically for working in confined spaces, including rescue. It has been designed to be set up by one person and is easy to transport. Manufactured to stand up to the harsh demands of everyday use, this confined space entry kit includes a basic rescue winch setup.

The basic rescue winch is ideal for rescue applications, and must be manually wound to raise or lower 20m down, with a bracket for a tripod or davit arm. The lightweight adjustable tripod has telescoping legs and non-slip feet.

The kit includes a full body confined space harness, spreader bar, 2 karabiners and a 9ft tripod with a SWL of 140kg.

### Kit Includes:

- Full body confined space harness
- Spreader bar
- 2 x karabiners
- 9 ft lightweight tripod
