

Standard Cable Hauling Rope (Parramatta Rope)

Product Images

Short Description

6mm x 400m roll of blue and yellow cable hauling rope, commonly referred to as Parramatta rope, Telstra rope or Drawline rope. Telecommunication cable pulling rope that is manufactured to the highest standards. Heavy duty 602kg break force.

Description

If you're looking for a reliable cable hauling rope that offers tangle-free uncoiling, look no further! Our 'Parramatta rope' is used for telecommunication cable pulling and cable hauling, and for installing fibre optic cables into main ducts. The three-strand twisted design offers maximum breaking strength and minimal kinking when pulling cables through conduit or pipes.

It boasts a 602kg break force (even greater than the manufacturer's specified minimum breaking strength of 595kgs or 5837N).

Jaybro's cable pulling rope is constructed from polypropylene and polyethylene at a 3:1 mix ratio. A smooth twist ensures tangle free uncoiling till the very end of the coil, meaning easy dispensing and no waste or frustrating knots. Supplied individually as a 400 metre roll, or purchase as a pallet lot of 45 rolls.

The 6mm 3-strand rope is made up of two blue strands & one yellow strand and is extremely easy to handle and guaranteed to get the job done.
