

Lubex Grease Blue EP2

Product Images

Short Description

Lubex eP2 high-performance grease, 450gm. A High-performance extreme pressure, multi-purpose grease, designed for high-temperature wheel bearings and chassis applications.NL GI Grade - 2, Thickener type - Lithium Complex with very good water resistance.

Description

450gm tube of Lubex Blue Grease. A premium quality, multi-use lithium complex grease. Able to provide excellent lubricating qualities over a wide range of temperatures. Lubex blue grease has excellent mechanical and chemical stability.

Designed for use in wheels and other bearings and as a multi-purpose grease. Use on cars, vans, trucks, construction plant, bulldozers, scrapers, loaders and dump trucks.

Prevents scuffing and reduce wear under high load and shock load conditions. Also has an excellent resistance to shear and high-temperature operation. The preferred choice over other multi-purpose greases in the industrial market.

Where water contamination or the water washout contaminating influences cannot be avoided, even at elevated temperatures, effective lubrication is maintained because of the excellent resistance to water washout. In these situations, it also gives protection against rusting and corrosion.

Recommended for ball joints that demand characteristics to ensure minimum wear and minimum torque with complete protection against rust.

- NL GI Grade - 2
- Thickener type - Lithium Complex
- Very good water resistance
- Weight: approximately 450g
- Box Qty: 20

Additional Information

CODE	41-LUBL450
U.O.M	Each
Form	Tacky
Net Weight	450gm
Colour	Blue
