

Hydraulic Pallet Truck

Product Images

Short Description

Hydraulic pallet jack, 195mm, 2500kg - 1235 mm total height.

Colors may vary

Description

Designed for lifting, lowering and steering pallets from one place to another, this hydraulic pallet lift truck has tough, high quality features making it ideal for industrial use.

This hydraulic pallet jack features a robust 3 stage fingertip control, enabling it to be easily operated on site or in your warehouse. With twin rear 180mm PU coated cast iron wheels, it is built tough to handle rugged use. The dual front wheels help to distribute the load over a larger surface area, and the entry rollers ensure that picking up pallets is nearly effortless. It has a 180 degree turning circle making it ideal for small spaces or narrow aisles.

Features:

- Robust and reliable
- 3-stage fingertip control (raise - neutral - lower)
- Bypass valve prevents overload
- Twin Rear 180 x 50mm Polyurethane-coated cast Iron wheels with metal hubs
- Dual front wheels, ideal for mezzanine floors to distribute the load
- Entry rollers, for effortless pallet entry
- Cast iron pump designed to increase pump life
- Greasing nipples provides lubrication to bearings
- 180 deg turning circle
- Chrome piston and ram for prolonged life
