Description

Be prepared on site or in the warehouse with a spill kit that is appropriate for the different types of substances in your workplace. Spill kits are convenient and compact bins or packs containing everything you need to mop up a spill quickly and safely. They contain the equipment you need when you need it. Plus, because they are portable, they can be positioned near potential spill areas, or near chemical or fuel storage zones.

This 90L general purpose spill kit will contain and absorb up to 90 litres of hydrocarbons such as oils, fuels and degreasers and non-aggressive water-based liquids like paints and coolants. [Refill spill kits](#) are available for this product online.
