
Platform Ladder - 0.9M

Product Images

Short Description

3 step platform ladder, 0.9m, fibreglass

Description

Fiberglass platform Ladders are designed to provide a self-supporting, stable and portable ladder. They are ideal for picking and packing situations, service and maintenance applications where a stable base is required whilst in use.

Fibreglass construction makes this ladder suitable for electrical work. Jaybro's range of platform ladders are non-adjustable - the platform is provided at the highest intended standing level. The ladders are hinged, creating a design allows for ease of storage. These ladders are intended for use by one person at a time.

ClimbMax platform ladders are made to Australian Standards for commercial and industrial use. Complies to Australian Standard AS/NZS 1892.3.
