
Fixed Surface Mount Steel Bollard 90mm x 900mm

Product Images

Short Description

Fixed surface mount steel bollard measures 900 mm high. Powder coated yellow for high visibility.

Description

Fixed bollards are ideal for use in areas where permanent protection from vehicles is required, ie: in front of buildings or to demarcate pedestrian only zones. This strong steel bollard measures 900mm high for adequate and easily visible protection. Powdercoated in safety yellow with a reflective strip, it gives easily visible warning to vehicles of no-go areas. A heavy duty control measure for your property, bollards block invasion of vechiles and help protect pedestrians. They signal car free zones, prevent parking in shared areas, prevent vehiclar access around warehouse areas and protect shopfronts from ramming.

- Safety yellow powdercoated steel with red reflective strip
- Measures 900 mm high x 90 mm wide
- M12 bolt holes
- Constructed from 5mm thick steel
- For situations where fixed bollards are not practical, Jaybro also supplies [removable in ground bollards](#) which allow access to authorised vehicles when required.
