

# Cool Neck Tie Neck Coolers

## Product Images

## Short Description

Water activated cool neck tie

## Description

---

Water activated, light weight and comfortable, this simple cooling neck wrap helps to keep workers cool in hot work environments. Directing a cooling sensation directly to the skin, the tie sits against the neck and helps to cool blood flow around the body.

Just soak the neck tie in cold water for 5 to 9 minutes. The cooling crystals go to work to keep you cool for hours. Lightweight and comfortable, the tie is a generous length, and can also be tied as a headband. The outer shell is 100% cotton, and it is filled with water absorbent crystals. Depending on your conditions the cooling effect can last up to 72 hours.
