

Stokes Litter Emergency Stretcher

Product Images

Short Description

The Polypropylene Stokes Litter basket stretcher is a **bulk item** that comes with four patient straps and has a traverse rated load bearing capacity of 272kg.

Description

The stokes litter basket stretcher is sturdy and flexible to use for all types of special first aid and emergency situations, for safely transporting patients. Its reliable fittings enable first aid personnel to operate safely and quickly in the event of a serious injury on site. With special sling equipment, the stretcher is ideal for lifting and transporting via helicopter, and is designed for securing inside a helicopter.

This stokes litter is ready for using and does not require assembling.

The 63-SLAL stretcher has four rapidly detaching belts to immobilise the patient during transport. One belt is used to restrain the chest area, another to restrain the pelvis and the other two to immobilise the legs.

Suitable for carrying by two fit people, this stretcher can also be fixed to a helicopter for emergency medical transport. 4 helicopter slings are included; two longer yellow straps which are attached at the lower end of the body and two shorter green straps for the upper body.

Refer to the enclosed manual for more information on connecting the various straps and attachments.
