

Bushman's Insect Repellent 130g Aerosol

Product Images

Short Description

Bushman insect repellent, 130g aerosol can.

Minimum purchase of 12 aerosols

Description

Bushmans insect repellent is well known for its effectiveness in challenging situations. The combination of an effective active ingredient blended with performance-enhancing, premium ingredients in formulations created with decades of experience make all Bushman products the best choice to protect you on site. Bushman is formulated in a unique way, that allows for the active ingredients to be slowly released, which results in improved performance. It is long lasting with protection times recorded up to 15 hours in real world scenarios. It contains 40% DEET - DEET has been proven over 60 years of use, to be a highly safe and effective repellent against mosquitoes and other biting insects.

All Bushman products have a pleasant, neutral scent. The otherwise strong smell of the active citronella is completely masked, plus its special formulation means it's comfortable to wear, and unnoticeable on the skin.

Unlike most rivals, Bushman is water resistant, sweat resistant and rub resistant meaning it won't be sweated off, washed off or rubbed off, allowing it to stay on the skin and continue to protect. However, for such a long-lasting repellent Bushman is neither oily or greasy.

Features:

- 8 Hours Protection Time
- Water, sweat & rub resistant
- Time release technology keeps the spray working for longer
- Effective against flies, mosquitos, bird lice, sand fleas, leeches, ticks, march flies and more
- Ultra-Long Lasting
- Ideal for tropical regions
- Pleasant, neutral odour
- 40% DEET (Diethyltoluamide), Ethanol, Butane, Propane
- 130g aerosol can
- Carton Qty: 12 cans
