

Appliance Test Tag - Mixed Colours 120 Pack

Product Images

Short Description

Appliance test tag, mixed, 120/pack - 110 mm x 45 mm

Description

After appliance testing has been determined as a 'pass', these test tags are attached to the appliance lead indicating when it was tested, when the next test is due, and a tracking code. Re-testing intervals of equipment can vary from 3 months to 5 years, depending of the environment where the equipment is located. Check Australian Standard AS/NZS3760 and your local regulations for more detailed information.

- Available in mixed colours or one colour packs
- Heavy duty outdoor vinyl
- Easy to write on
- Writing is protected by clear over-laminate. Once the necessary information is filled out on the tag, the clear laminate is applied by pressing down to seal the writing.
- Strong and highly visible tags will not tear or detach easily
- Fold the tag around the electrical cord and stick together
- Contains spaces to write all necessary regulatory information
