
Black and Yellow Rubber Wheel Stop 1.65 metre

Product Images

Short Description

1.65m rubber wheel stops for car parks. Black heavy duty rubber with reflective yellow chevron taping. Weighs 14kg. Complies with AS/NZS 2890.1:2004

Description

Durable rubber wheel stop with reflective yellow tape that is highly visible to both motorists and pedestrians. Rubber wheel stops are the ideal substitute for concrete stops that can crack and dislodge easily.

Australian Standard AS/NZS 2890.1:2004 states wheel stops must have a height between 90 - 100mm and a width of 1650 mm. These durable, heavy duty wheel stops measure 160 mm x 100 mm x 1650 mm. Wheel stops are ideal for applications such as car parks, shopping centres, warehouses and factories or any situation where a limited travel space is required in a parking spot. The solid design is effective at gently stopping vehicles, and it is simple to install with the addition of 360 mm long wheel stop fixing pins, sold separately.

Features:

- Complies with AS/NZS 2890.1:2004
- Tough one piece design with yellow hazard-look reflective bead tape
- Made from quality recycled rubber
- Easy to install
- 3 anchor holes / fastening points
- Weighs 14kg
- Measures 1650mm long x 160mm wide x 100mm high
- 360 x 13 mm fixing pins sold separately, see Code 82-WSFIX
- Suitable for use on gravel, asphalt, bitumen and other hard surfaces
- Ready for use immediately once installation is complete - no waiting for concrete to set like with concrete wheel stops
