

Ansell Alpha Tec Glove, Size 10 - while stocks last

Product Images

Short Description

Ansell Alpha Tec Gloves in size 10. These medium duty industrial gloves are ideal for metalworking, loading and unloading equipment, as well as handling and cleaning applications. The Alphatec insulated grip gloves offer a unique combination of liquid-proof chemical resistance and grip, together with flexibility and dexterity, that makes these gloves the logical choice when working with chemicals.

Description

Ideal for a range of applications, the Ansell AlphaTec glove incorporates revolutionary ANSELL GRIP™ technology to enable users to handle wet or oily objects with less grip force and more control. This unique combination of liquid proof chemical resistance and grip, together with flexibility and dexterity, makes the AlphaTec glove the logical choice when working with chemicals.

It offers reliable chemical protection for added user safety. The patented ANSELL GRIP™ technology ensures that the coating polymer does not penetrate the liner during manufacture. The coating is therefore consistent and sound, significantly reducing the likelihood of chemical leakage onto the skin.

Provides the user with an unrivaled combination of chemical resistance, confident grip, and a comfortable inner lining.
