

Uvex Whisper Plus Detectable Corded Ear Plugs

Product Images

Short Description

The Whisper Plus by UVEX is a reusable, highly detectable and functional corded earplug. Providing first-class hearing protection for people working within food handling, preparation and medical industries, with a rating of SLC80 22.5 dB Class 4. These earplugs provide exceptional sound insulation and are easy to clean for long term use.

Description

Uvex Whisper Plus detectable blue corded earplugs provide the wearer with an easy-to-clean, reusable earplug with extra comfort.

Hearing protection such as earplugs are often worn in dirty working environments, allowing dust and particles to stick to the surface of earplug, eventually ending up in the wearer's ears.

Uvex Whisper Plus delivers a smooth and dirt-repellent surface designed to be easily cleanable with soap and water. This increases wearer comfort and safety for the user.

The Whisper+ earplug is detectable and therefore ideal for hygienic environments such as the food and medical industries. The blue design indicates the detectable properties of this product meeting food safety standards.

These SLC80 22 dB, Class 4 corded earplugs meet AS/NZS 1270 Standards. The corded design of the earplug allows it to be worn comfortably around the neck when not in use. This is the recommended choice for long term hearing protection in industrial and high volume working environments.

Features:

- SLC80 22 dB, Class 4
- Detectable corded earplugs
- Washable and reusable
- Ideal for the food industry
- Meets AS/NZS 1270 Standard
