

3M 9312 P1 Flat Fold Dust Mask Respirator with Valve, Box of 10

Product Images

Short Description

The 3M 9312 dust mask is individually packaged for hygiene. The unique three-panel design allows the respirator to mould onto your face and accommodates facial movements without compromising fit. The valve helps to release exhaled breath quickly for cooler wear. Supplied in a box of 10.

Description

The 3M 9312 Particulate Respirator provides a comfortable fit for protection against dust particles and non-volatile liquid particles. This P1 valved dust mask is suitable for processes such as sawing, sanding, crushing and grinding. A general purpose dust mask, this FFP1 protective respirator is supplied in a box of 10. This disposable respirator is compatible with other PPE such as eyewear and earplugs.

Suitable for:

- P1 Protection
- Mechanically generated particles / dust

Features:

- Foldable, patented 3 panel design allows for greater facial movement
- Suitable for mechanically generated particles eg sanding
- Individual hygienic packaging protects the respirator from contamination before use
- Nose foam made of sweat absorbent material, soft on the skin
- Even strap pressure improves comfort on the neck, face and head with a secure feel
- 3M Advanced Electret Filter Material gives effective filtration with low breathing resistance for consistent high quality performance
- 3M Cool Flow exhalation valve offers improved comfort in hot humid environments
- Coloured headband for easy identification: yellow for P1
- Complies with AS/NZS 1716
