Product Images

Short Description

Box of 20 each 3M 9300A+ series P2 respirators to comfortably mould onto your face and accommodate facial movements without compromising the fit. Flat fold dust mask for convenience and easy storage. The hygienic individual packaging helps protect the respirator from contamination before use. An innovative chin tab improves ease of donning and adjustment to help achieve a comfortable fit. Offers P2 protection against dust and other particles.

Description

This 3M 9320A+ Aura P2 Particulate Respirator sets new benchmarks in wearer comfort. The advanced three panel design and ultra soft inner cover web allows the 3M 9300A+ series respirator to comfortably mould onto your face and accommodate facial movements without compromising the fit. Being foldable, they offer more convenience than traditional cup shaped respirators. Its features include a headband material which helps even out strap pressure, and low breathing resistance thanks to 3M's electret particulate filter material.

The flat fold style offers convenience, making it easy to store when not in use. The hygienic individual packaging helps protect the respirator from contamination before use. An innovative chin tab improves ease of donning and adjustment to help achieve a comfortable fit. An embossed top panel helps reduce fogging of eyewear, and the nose panel conforms well to the nose and eye contours and helps provide a good field of vision. The curved, low profile design also improves compatibility with eyewear.

The 3-panel design fits a wide range of face shapes and sizes and accommodates facial movements. The collapse-resistant feature makes it stays securely in place, helping to provide a good, comfortable seal. The large soft nose foam material and smooth inner cover web help to create a comfortable environment for the face even for work in hot humid environments.
