

3M 9913V P1 Dust Mask Respirator with Valve, Box of 10

Product Images

Short Description

GP1 Particulate/Nuisance Organic Vapours & Odours Exhalation Valve (Box 10). Suitable for nuisance level organic vapours such as agricultural chemicals with low vapour pressure.

Description

An activated carbon layer in this dust mask reduces exposure to nuisance levels of organic vapour and odour. The robust shell and cup design is resistant to collapse. Made from 3M™ Advanced Electret Filter Material for effective filtration with low breathing resistance, the 3M 9913V Valved P1 respirator is perfect for nuisance vapours, and features an exhalation valve for wearer comfort.

It is important to wear respiratory protection when handling agricultural chemicals like pesticide and herbicide. 3M's 9913V, a disposable specialty respirator has type 'G' class rating that can be worn when handling agricultural chemicals with low vapour pressure (below 1.3 Pa @ 25oC). Nuisance levels are those levels below the Workplace Exposure Standard The 9913V respirator is compatible with other PPE such as eyewear and earplugs.

Suitable for:

- P1 Protection
- Nuisance Level Organic Vapors

Features:

- Galvanised steel nose clip allows use in flammable atmospheres
- Activated carbon layer reduces exposure to nuisance levels of organic vapour and odour
- Robust shell and cup design that is resistant to collapse for durability
- 3M Cool Flow™ exhalation valve helps to breathe easier during prolonged wear
- Made from 3M™ Advanced Electret Filter Material for effective filtration with low breathing resistance
- Does not contain components made from natural rubber latex
- GP1 rated filtration efficiency
- Protects against hazards such as dusts, mists and fumes
- Complies with AS/NZS 1716:2012
- Packaging: 10 respirators / box
