

# Loc-Socket Wedge Pins

## Product Images

---

## Short Description

---

Loc Socket post wedge for inserting 50 mm NB posts into concrete. Note the complete LOCSOC Loc-Socket product is sold separately.

## Description

---

The Loc Socket post mount is an ideal solution for mounting sign posts in concrete, brick and paved areas. The Loc-Socket allows damaged sign posts to be easily removed without having to dig up concrete footings. It

provides a flush and level installation - simply drive down the pin to remove the post. Can be used with fence posts, traffic signs, street signs and other sign posts. It is used by mounting the post socket flush in concrete at ground level. Then, the reusable wedge is driven down alongside the post to secure it.

This product is the Loc-Socket wedge pins, the complete Loc-Socket system is available separately.

- Retaining pins for reusable post footing device
- Can be safely mounted flush into concrete
- Use with 50mm NB sign posts and Loc-Socket system Plated steel for long life
- Loc-Socket Wedge Pin only - complete Loc-Socket sold separately
