

LED Light Box For Trafix 2000 Water filled Barriers

Product Images

Short Description

LED Light to suit Trafix 2000 Water filled barrier. Designed to fit into the moulded light mount of the Trafix 2000 barrier, the lightbox measures 230mm (L) x 150mm (H) and provides a suitable amount of light, providing delineation during deployment.

Description

LED light manufactured to suit the Trafix 2000 plastic water filled barrier range. This self-charging light unit is self-activating at night. Designed to provide effective light delineation on deployed barriers. The light unit will automatically switch off once daylight has resumed.

The light box includes M6 brass bolts for mounting. The battery is a rechargeable 1.2V 300mAh unit that powers the LED light. A 5 mm high-luminance LED displays a Amber/Yellow light. The unit is sealed and waterproof with an IP68 rating. Charging the unit is a internal solar panel with 95MA Power / 2 Volts.
