Choose the required size from the drop down below. If you need help decoding the different types of soles, toe caps and footbeds, take a look at our article on the [different features of safety footwear](#).

Description

Hardwearing lace up steel toe work boots. A side zip saves time when putting on or taking off. Easily widen the foot mouth opening without unlacing your boots. The Argyle range of steel cap work boots has a proven track record on site. Used by civil and construction contractors Australia wide. The Steel Blue zipper far exceed all tested minimum requirements.

These boots feature a 150mm derby style lace-up and zipped sided ankle boot with padded collar and tongue for maximum comfortability. Water Resistant Nubuck Leather and 200-joule steel provide safety and durability. The TPU outer-sole is heat resistant to 130° C surface contact and is resistant to most oils and acids.
