

GEOmasta Premium Hardwood Silt Fence Stake 38 x 38 x 750mm

Product Images

Short Description

Hardwood silt fence stakes suitable for landscaping and fencing applications. Measures 38 x 38 x 750mm, **sold in bundles of 6.**

Description

Ideal for tree planting and landscaping applications as well as fixing silt fencing. Manufactured from premium Australian hardwood, these council-compliant tree stakes are suitable for both commercial and residential purposes.

Hardwood tree stakes support proper tree management and growth. Their strength and durability makes them an ideal tree stake material, being tough and long-lasting. Hardwood's durability is derived from the way the tree forms its cellular structure, creating a very dense wood that resists heavy duty outdoor use.

Jaybro's GEOMasta products such as hardwood tree stakes are perfect for landscaping contractors planting out large estates and verges. This quality landscaping range is ideal for commercial and residential developments. Plus, GEOMasta products comply with the requirements of many local councils and civil contractors.
