Description

Uvex rubiflex S NB60SZ is a reliable chemical protection glove. Designed to provide a high level of hand protection when handling chemicals.

These chemical protection gloves are manufactured with a thick cotton interlocked lining. This makes the uvex rubiflex S suitable for many applications. Uvex's rubiflex s offers protection against chemicals as well as increased mechanical protection (for example against heat). The special 60 cm version is available with an elasticated gauntlet end for further protection.

This glove is certified to EN 388: 2016 (2 1 2 1 X) and EN ISO 374-1:2016/Type B (J K O P T). A Long NBR chemical protection glove with reinforced cotton interlock supporting material, which includes an elastic collar at gauntlet end (NB60SZ/NB80SZ).

these gloves are fully coated with special NBR coating (nitrile rubber), approx. 0.50 mm thickness and offer good mechanical abrasion resistance thanks to the NBR coating. They also provide a good level of resistance to many chemicals, acids, alkalis, mineral oils and solvents.

The comfort features of this glove include a good tactile sensation, ergonomic fit and outstanding wearer comfort. they are free of harmful substances in accordance with OEKO-TEX® Standard 100.

If you are looking for a safety glove with cotton layer and NBR coating suitable for working with chemicals, then this is the glove for you. Recommended for chemical industry, sewer construction, municipal cleaning, sandblasting and more.
