Description

The Maxiform ® Nitrile Glove, designed for general purpose hand protection. Recommended for duties including general purpose handling in oily and dirty conditions.

Manufactured from an ultra light foam nitrile on a light 15 gauge seamless nylon liner. Providing the greatest level of comfort for the wearer. The surface of the glove designed to “channel” away oils, offering a better grip.

The light coating provides improved flexibility and dexterity. This gloves has exceptional grip in dry or wet conditions.

Produced in a dark colour combination to keep the gloves looking “cleaner” for longer.

Suitable for numerous applications including civil and construction tasks, DIY, finishing and inspection, landscaping , handling of small components, logistics and warehousing and much more.

Glove Specifications - Rated to EN388:2003 with Abrasion Resistance: Level 3, Blade Cut Resistance: Level 1, Tear Resistance: Level 2 and Puncture Resistance: Level 1.

- Excellent dexterity, comfort and grip
- Foam coating gives excellent breathability
- Keeps hands cool & dry
- Sanitised for antimicrobial infection
- Solvent free manufacturing process
- Silicone free
- Excellent value
