

Maxidry GP 3/4 Dipped Slip Resistant Glove

Product Images

Short Description

ATG Maxidry 56/424 palm-coated knit wrist hand protection. Available in sizes: 7 to 11. Always ensure that if you are working with chemicals that the gloves have the chemical pictogram printed on the glove and are suitable for the chemical that you are exposed to. For more information on glove pictograms, take a look at our article on [glove markings and standards](#). Select your required size from the drop-down menu below.

Description

The MaxiDry® is a leading safety glove known for precision handling. The super thin and flexible design is comfortable and allows for excellent dexterity. This glove has technology that provides resistance to liquids and reduces hand fatigue while maximising dexterity and flexibility.

A synthetic coating combined with an industry-leading super light seamless knit liner provides excellent comfort. A micro-cup non-slip grip finish on the palm allows for a controlled and superior grip in oily and wet applications.

These work gloves are ideal for protection against oils, liquids and chemicals. They are approved to international European standards EN 388:20034121 / EN 388:20164121A

The benefits of this glove include GripTech “micro-cup” technology, excellent dexterity & flexibility and a high abrasion resistance (Level 4). Palms are 3/4 coated.
