

Nitrile Solvent Flocklined Glove

Product Images

Short Description

Chemical solvent resistant gloves with a flock lining. Flock-lined gloves have a cotton lining that is designed to help the wearer to put on and take off the glove. These gloves are available in sizes Small to Extra Large in a 30cm length. Select your required size from the drop-down menu below.

Description

These solvent-resistant nitrile gloves are flock lined for increased comfort and usability. This gloves provides a good level of resistance to solvents, oils and grease. The 30cm length of the gloves provides adequate protection for hands and forearms.

The flock lining enables the wearer to put on and take off these gloves with ease. The flock lining also acts as insulation, keeping the wears hand warm. The lining will also absorb perspiration, keeping hands dry and moisture free.

With so many types of gloves on the market, it's often hard to choose the right glove for your needs. Nitrile gloves have become the glove of choice for many industries, with specific brands and types of gloves designed for chemical handling. It's important that the wearer or the person purchasing the gloves understands what the risks are for their particular application, and what levels of protection the gloves need to provide.

If you have any questions relating to hand protection, types of glove or just need help choosing the right solution for your application, please call our friendly team.
