

Unilite Unvented Safety Helmet

Product Images

Short Description

Colours: White, Yellow, Blue, Fluoro Orange, Fluoro Yellow, Green, Grey, Orange, Red, Watermelon

Description

Australian workplace safety recommendations state that hard hats need to be worn on sites when there is a risk of being hit by falling objects or from a collision with solid objects. This covers almost all worksites, so helmets are an essential piece of equipment for construction, civil, building and industrial workers. Hard hats protect workers from impact by deflecting hits to the outer shell. Inside, the harness or suspension system stretches to absorb and spread the shock of impact evenly.

Employers are responsible for providing their workers with Australian Standards compliant hard hats. Note that hard hats or safety helmets must be replaced if damaged, no matter how new or old they are.

Additionally, they also have a working life and a 'use by' date stamped on the inside. Ensure your helmet is regularly inspected for damage or cracks and replace it at the first signs of structural wear. Refer to Australian Standard 'AS/NZS1800:1998 Occupational Protective Helmets - Selection, care and use' for more information on hard hats, and to ensure you are adequately protected on site.

The Australian made UniSafe TA560 ABS Type 1 safety helmet is unvented and ideal for general industrial, construction and mining.

- 25mm moulded slots accept all UniSafe cap attachd earmuffs
- Colour Options: White, Yellow, Blue, Fluoro Orange, Fluoro, Yellow, Green, Grey, Orange, Red
- Certified to AS/NZS 1801:1997
- Constructed from moulded ABS Plastic
- Nylon webbing 6 point harness
- Terry towelling sweat band
