Short Description

Geomasta Hardwood Stake 50X50x600mm

Description

Geomasta Hardwood Stake measures 50 mm x 50 mm x 600 mm.

The GEOMasta™ range of premium hardwood stakes is perfectly suited to landscaping contractors. Manufactured from premium Australian hardwood, these council-compliant tree stakes are suitable for both

commercial and residential purposes.

Hardwood tree stakes are specified by many local councils to support proper tree management. Specifically, hardwood stakes are required due to their strength and durability. Hardwood is an ideal tree stake material, being tough and long-lasting. Its durability is derived from the way the tree forms its cellular structure, creating a very dense wood that resists heavy duty outdoor use.

Jaybro’s GEMasta™ products such as hardwood tree stakes are perfect for landscaping contractors planting out large estates and verges. This quality landscaping range is ideal for commercial and residential developments. Plus, GEMasta™ products comply with the requirements of many local councils and civil contractors.
