

FortiAnchor General Purpose Formwork Silicone 300ml

Product Images

Short Description

General Purpose Formwork Silicone Sealant with high strength elasticity and excellent resistance to weather. This non-corrosive silicone is ideal for sealing and fixing formwork and has a neutral base. It offers good compatibility with other neutral sealants.

Description

FortiAnchor general purpose formwork silicone sealant is a single component, neutral curing formwork silicone.

It has high tensile strength and high cementation ability. FortiAnchor silicone is non-corrosive to marble, glass, concrete and metal (not copper). It has good compatibility with other neutral silicone sealants.

Features:

- Flexible with high strength elasticity
- Waterproof sealant
- Excellent adhesion to wood, stone and metal
- Single-component, neutral curing - good compatibility with other neutral sealants
- Non-corrosive
- Weatherproof

Suitable for:

- Sealing gaps within formwork
- Sealing gaps when formwork butts up against other materials
- Sealing formply sheet edges and joints
- Creating a watertight seal on the formed face
- Helps prevent ragged edges, honeycombing and colour variation in concrete
- Non-structural glazing
- Roofing applications
- Sealing external cladding
