

# Through Bolts M16 x 105 mm Galvanised

## Product Images

## Short Description

---

Through Bolts M16 x 105 mm Galvanised. M16 anchor diameter hole = 16 mm.

## Description

---

M16 x 105 mm Galvanised Through Bolts suitable for use in cracked and uncracked concrete. These high performance fastener through bolts use a 3 piece expandable sleeve. The 3 piece sleeve provides easy torque setting at minimal number of turns of the anchor nut.
