

Hoop Iron Punched Builders Strapping, 30mm wide x 30m Roll

Product Images

Short Description

30 metre roll of hoop iron, punched with offset holes, 30mm wide x 0.8mm thick iron.

Description

Hoop Iron or builders strapping is used in the building and construction industry and is suitable for a wide variety of bracing applications. This product can be used for tie-down and other joints in timber-framed construction. It is easy to use as a steel bracing for roofs, walls, ceilings and floors. A Z275 Galvabond finish ensures reduced rust and corrosion.
