# Flextool Concrete Vibrator - Rubber Tip 60mm x 9m

## Product Images

---

## Short Description

---

Concrete Vibrator Shaft 60mm x 9m. The Flextool VP Series of Immersion Concrete Vibrators produce high frequency vibration allowing for the efficient compaction of low slump concrete mixes.

## Description

---

Flextool's original series of immersion concrete vibrators produce high frequency vibration allowing for the efficient compaction of all types of concrete mixes. The newly improved Flextool FVP series now come with three heavy duty bearings and double oil seal protection for optimum performance and longer service life. The resilient nose caps on the Flexshaft Rubber Tip Concrete Vibrators extend the life of form boards and improves off-the-form finishes.

Flexshaft Rubber Tip Concrete Vibrators come in a range of 4 different flexshaft length and vibrator head diameter combinations:

- Flexshaft length: available in 6m and 9m
- Vibrator head diameter: range from 38mm to 60mm

### **Features:**

- Heat treated nose cap and rotor - reduces wear and tear from abrasive concrete aggregates
- Heavy duty double row self-aligning bearing - extends service life
- Vibration counter spring - reduces vibration transfer to the operator; improved safety and comfort
- Two sealed bearings - isolation of load transfer resulting in improved durability
- Heavy rotor for high vibration amplitude - get the job done faster
- Double oil seal protection - reduces maintenance frequency

### **The Flextool Promise:**

If the unexpected happens and something goes wrong with your Flextool equipment within the first 12 months of purchase, Flextool will arrange a loan machine for 2 days, free of charge, so you can get the job done. If a Flextool product breaks down on site, get in touch with Flextool customer service for assistance with arranging a loan machine through your local hire partner.

## Additional Information
