

Rumble Bar - 300mm White

Product Images

Short Description

300 mm white rumble bar, supplied with 2 x anchor bolts. Provides a visual delineator to motorists for traffic islands, median strips, edge markings and centre lines.

Description

Rumble bars or rumble strips are designed to be used in a series to make an audible noise when driven over. Made from recycled rubber they are heavy duty and hard wearing. They provides a visual delineator to motorists to warn of upcoming traffic islands, median strips, edge markings and centre lines. They are tough and will not crack, meaning they are low maintenance once installed. The rubber construction retains permanent colour and does not require painting like concrete. These surface mounted rumble bars are easy to install with the supplied anchor bolts.

Features:

- Ideal for centre lines, edges, traffic islands and tight bends
- Surface mounted
- Provides a visual and audible warning to motorists
- Easily installed - can be screwed or glued in place
- Heavy duty
- Does not crack like concrete
- Does not need painting
- Constructed from recycled rubber
- Checkerplate finish for slip resistance
- White is highly visible against bitumen
