

Smith Heavy Duty Stainless Steel Sprayer 13.25L

Product Images

Short Description

13.25L heavy duty sprayer features a large wide-mouthed opening that is easy to fill. With over 13 litres capacity it is ideal for wetting down concrete and other industrial applications.

Description

This heavy duty sprayer from Smith Performance Sprayers features a large wide-mouthed opening that is easy to fill. With over 13 litres capacity it is ideal for wetting down concrete and other industrial applications. A push-button pressure relief valve makes it easy and quick to release internal pressure before opening the canister.

Stainless steel, inside and outside the canister, means a compression sprayer with high chemical resistance and a very long lifespan. No need for epoxy coatings.

- 3.2L capacity stainless steel tank
- A-grade stainless steel AISI-304
- Viton seals throughout the pump and shut-off
- Pump automatically releases pressures above 85 psi to prevent over-compression
- 1270mm chemically resistant rubber hose is reinforced with nylon for greater wear resistance
- 2 Brass Flat Fan nozzles included for multiple flow rates
- Accepts TeeJet nozzles
- Four-prong lock seals the pump tightly against an internal O-ring
