

Metcut Supercut 1000 5L Cutting Fluid

Product Images

Short Description

Supercut 1000 5L Cutting Fluid is a water-soluble cutting lubricant oil for use in reaming, tapping, drilling and other metal cutting operations. Ideal for turning (including light automatic work), milling, drilling, boring and shaping.

Description

Morris Supercut 1000 is a water soluble metalworking fluid, manufactured from high quality paraffin base oils with added preservatives along with lubrication and anti-corrosion additives.

It is readily miscible with water to form a stable, rich, milky white emulsion of low odour and good corrosion protection. Supercut 1000 is non-staining to both ferrous and non-ferrous alloys and may be used in a wide variety of applications such as turning including light automatic work, milling, drilling, boring and shaping.

Features:

- Chlorine / Phenol / Nitrite Free
- Water soluble with high oil content (mineral base)
- Low odour
- Economical
- Good corrosion protection
- Ideal for general machining, free machining metals, non-critical grinding, ferrous and nonferrous alloys
- 5L container
- General Machining Concentration: 5% typical
- Ferrous Grinding Concentration: 4% typical

Additional Information

CODE	40-CL5L
U.O.M	Each
Size	5 L
