

Makita 7" Angle Grinder 2200W

Product Images

Short Description

The Makita GA7060 Angle Grinder is a powerful 2200W 180mm 7" angle grinder. Designed and engineered with excellent stability, resulting in longer life expectancy of the tool. Comes with wheel guard, side handle, inner flange, lock-nut and wrench.

Description

The Makita GA7060 7" grinder combines a powerful 2200 Watt motor with superior user comfort. Featuring motor protection for longer-lasting industrial usage, this Makita grinder is the ideal 7 inch angle grinder for construction contractors, masons, welders, electricians and people in the automotive industry. A balanced motor with greater armature stability and larger commutator bars offers 3 times longer life compared to previous models, and the spiral bevel gears give smoother rotations and a more efficient transfer of energy. The Makita angle grinder is compact and balanced with a high-performance 2,200W motor, with uses across a wide range of industrial applications. With a two stage trigger for added safety, it is designed for reliability with dust proof construction.

Features:

- Rear handle trigger switch with lock-on feature
- Balanced motor with armature stability and larger commutator bars
- Sealed construction protects the motor and bearings from dust and debris
- Spiral bevel gears for smoother rotations
- Side handle installs in three locations for operator comfort in various applications
- Aluminum gear housing provides superior gear alignment and smoother transmission

Specifications:

- Model Number GA7060
- Weighs 5.3 kg
- Wheel Diameter: 7" / 180mm
- Continuous rating input 2200W
- No load speed 8500 RPM
- Power Type: Corded
- 2.5m metre cord length

Included:

- 1 x Side grip
- 1 x Lock nut
- 1 x Inner flange
- 1 x Inner and outer flange for cutting
- 1 x Grinding wheel guard
