

Pecafil Formwork VR6 1200 x 2250mm - Not available in WA and SA

Product Images

Short Description

Pecafile Formwork Vr6 1200 X 2250Mm

Description

Max Frank Pecafile formwork saves you time and takes the hard work out of construction. Pecafile is the tried and tested solution for today's construction professionals. The specially manufactured material is constructed from a steel mesh in a wide range of sheet and strip sizes with various wire diameters, shaped to meet your needs. Its distinctive yellow outer layer is heat-shrunk polyethylene, made from non-toxic, naturally occurring hydrocarbons.

Pecafile replaces conventional timber or steel shuttering for the in-ground construction of pile caps and ground beams, to provide fast and accurate formwork installation. Pecafile is suitable for a range of applications, using standard or custom-manufactured elements.

Features and Benefits

- Site drawings are quickly transformed into factory produced panels
- A wide range of standard and bespoke panels and forms for virtually all applications
- Saves time and costs on blinding, labour and spoil removal
- Curved or complicated foundation forms can easily be produced on-site
- No stripping, cleaning or return of the formwork
- Light enough for just one person to handle - no need for hoists, ready for rapid assembly
- Fast and easy to install - can be cut with basic tools
- Re-use your Pecafile forms, depending on the specific site conditions and construction method - no waste
- Reduced working space requirement

Sizes Available:

- 600mm wide up to 1800mm wide
- 2250mm long sheets
- Grid dimensions 150 x 75mm
- Yellow foil
