

Malthoid Strip Waterproofing Tape, Bitumen Impregnated

Product Images

Short Description

20 metre rolls of malthoid tape, choose from 110 mm wide up to 300 mm wide.

Description

Malthoid is a durable, waterproof material made from felt impregnated with bitumen. It is covered in a fine grit to stop it from sticking when it is rolled up. Malthoid is commonly used as a waterproofing between timber and concrete and is suitable for roofs, decks and other surfaces.

Features:

- Easy to handle
- 2 ply felt material impregnated with bitumen

- Fine sand coating prevents sticking when rolled
- Malthoid is inert to lime in mortar mixes
- Available in a range of sizes for different applications
- 20 metre rolls

Ideal for:

- Insulates wood from water ingress through wicking
- Waterproofing of roofs, flat tiled, corrugated, etc
- Roof flashings
- Between deck boards and supporting joists
- Also used to prevent condensation
- Damp course on brick, stumps & blockwork walls
- Also used under corrugated iron water tanks to prevent condensation corrosion
