

# Chisel Point Studs Galvanised Construction Fasteners

## Product Images

## Short Description

---

Chisel point studs construction fasteners, made from quality 5.8 Grade carbon steel. Suitable for use with glass capsules or any adhesive injection system.

## Description

---

Chisel point stud, non expansion type anchor fastener. Used in pre-drilled holes with a chemical adhesive or injection system.

The installation of the stud done by inserting a suitable curing resin into the pre-drilled hole using either a chemical capsule or injection adhesive. The stud is then inserted and rotated, allowing for proper setting into the resin. Note: Load can be added to the Anchor once the appropriate curing time has passed.
