

# Sign Bracket - 1-Way Street Blade Sign Bracket 200mm

## Product Images

## Short Description

---

This galvanised sign bracket makes it easy to fit 1 street name sign onto a pole and comprises a two piece 200 mm galvanized collar and fixings to suit a regular street sign pole. Fits 50mm NB pole.

## Description

---

Jaybro's range of galvanised street sign products includes a wide selection of poles and brackets, making it easy to fix street name signs in whatever configuration is required. This single sign bracket consists of a galvanized two piece collar and screws to suit any standard street pole, including Jaybro's range of sign posts. At 200mm long this bracket makes it easy to fit 200mm high street name signs using 2 fixings per sign. Fits 50mm NB pole.

A 150 mm option is also available for street name blade signs with a smaller height. Jaybro carries a full range of sign products including 2-way street name sign brackets, as well as 3-way street blade bracket suitable for T-intersections, as well as specialised brackets to suit curved and flat telegraph pole surfaces, multi-message signs and a range of brackets for braced street signs.
